

DELIVERING GROWTH LOCALLY

Building Plymouth Expertise Directory 2026/2027

PLYMOUTH
Britain's Ocean City

Delivering growth in Plymouth

With a £9 billion investment pipeline and plans to deliver 10,000 new homes alongside major city centre regeneration, the construction industry in Plymouth and the wider southwest region is critical to the delivery of accelerated economic growth, and to the current pipeline of work that is being undertaken now and in the future as part of the Defence Growth Deal being led by Team Plymouth.

Underpinned by a decade of coordinated action through our award-winning Council-led sector skills partnership Building Plymouth, we recognise this as a tremendous opportunity for working together to drive sustainable and inclusive growth, for creating long-lasting, high quality skilled jobs, as well as attracting inward investment over the coming years with more than enough work to go round.

From a Building Plymouth perspective, we are certainly keen and ready to maximise these opportunities for local investment in construction skills and training, job creation and career progression, and ensuring sustainability of local construction employment, in a time of current market uncertainty which should give confidence to those local companies looking to stay, grow and invest.

Collectively employing an 9,000+ strong workforce, Plymouth has a well-established, mature and capable construction community with a breadth of expertise which makes this a very adaptable and responsive marketplace. Relationships in the city are strong across the consultants, contractors and supply chain, and Building Plymouth has enabled the whole sector to unite and join forces for the greater good.

Our Building Plymouth Expertise Directory demonstrates the strength of our local capabilities across construction and the built environment. To maximise benefits we welcome local spend to be considered a priority to keep the Plymouth pound as much as possible invested in local employment enabling sustainable growth for construction businesses. A commitment to local spend approach will also deliver increased social impact leaving lasting legacies for our communities through our dedicated focus on achieving meaningful social value whilst we help clients to deliver these exciting projects for Plymouth.

David Bayliss

Building Plymouth Chair and Design and Business Manager at Obedair Construction

“

**Plymouth is entering a
'once-in-a-generation'
investment moment**

”

Working together on skills, training, education, careers and jobs in construction and the built environment

Investment in Building Plymouth

Our vision: Working together to address the city's skills needs by attracting, and investing in, a skilled supply of people to match the demand for delivering the city's ambitious capital build programme and transitioning to a net zero carbon economy.

Celebrating 10 years of working together, Building Plymouth is an award winning, Council-led sector skills partnership with the local construction and built environment sector, driving skills, training and employment, maximising social value and impact, and acting as a united voice for the industry. Building Plymouth is funded through an innovative public/ private partnership with over 70 member organisations co-investing during 2026/27 (see the logo summary of members on the opposite page). Together we have created a trusted and well-established infrastructure connecting the local authority, clients, contractors, subcontractors, consultants and the supply chain, as well as CITB, training providers, education institutions, Department for Work and Pensions and supporting skills agencies.

This innovative public/ private sector model has been replicated widely across the southwest region and nationally and is recognised as being the blueprint for developing other city coordinated sector skills partnerships.

Facilitated by Building Plymouth, Plymouth City Council is a CITB accredited National Skills Academy for Construction committed to maximising employment and skills opportunities through local planning and procurement in Plymouth which ensures delivery of employment and skills interventions including apprenticeships, work placements, job creation and up-skilling opportunities on major developments in the city.

We recognise that competence is critical for the future of the construction industry and recruitment of sufficient numbers of competent skilled people has been a long-standing challenge for the sector, with an ageing workforce further accelerating these skills shortage issues. We are working hard together in a coordinated way to tackle the recruitment and retention challenges and improve the image of the industry to attract a more diverse and younger workforce, as well as to upskill the existing skilled workforce so that they can transition from the current set of traditional occupations and skills to the green, digitalised, modern methods of construction, and more productive competencies and jobs that the industry will need over the next decade.

To learn more about the impact of Building Plymouth visit [BP10 V3 | Videos & Movies on Vimeo](#)

Working together to maximise Social Value and Corporate Social Responsibility

We recognise that Social Value and Corporate Social Responsibility must be more than reports, figures in a spreadsheet or tick boxes: it is about delivering impact, leaving a legacy and genuine improvements in the lives of real people. Below are examples showing what Building Plymouth has been doing for our communities through coordinated action:

- In our 10th year of Building Plymouth, we raised funds for two local charities (St Luke's Hospice Plymouth and Shekinah)
- Coordinated a construction industry response for the Keyham Garden Recovery after discovery of a second World War bomb for three homes valued at £40K in-kind support
- Delivers over £111K value annually through Mission Mammoth STEAMFest and Awards Ceremony, a design challenge which positively connects primary school children with the world of construction and the built environment
- Hosts Early Careers Fairs to promote the local apprenticeship and graduate opportunities to the residents of Plymouth
- Every secondary school in the city has been 'Adopted' by a local construction company to raise aspirations and inspire the next generation
- Celebrates the city's top trade and technical construction apprentices through Building Plymouth Awards held in National Apprenticeship Week
- Coordinates BPART (Building Plymouth Aspirational Rising Talent) Network which offers construction apprentices, recent graduates' and current University of Plymouth students access

to a free 12-month CPD programme delivered in-kind by construction employers to support their development, to increase knowledge of how the industry works and to create a strong network for peer support.

As well as gaining support for delivering these voluntary social value initiatives, we recognise that through embedding meaningful into procurement strategies for local construction projects this will enable the investment to go much further and direct it in a way that has the most social, economic and environmental benefits. We encourage the city's clients to unlock the Social Value opportunity inherent in every public pound spent as the local marketplace is well set up to respond positively and are committed to leaving lasting legacies from the significant construction investment.

FIVE YEARS OF MISSION MAMMOTH STEAMFEST!

2,000 students

26 primary schools and home educated groups

400 construction volunteers

£20k worth of sponsorship

Total social value - £550k

Contractors - A-Z local expertise
